QUALITY MANAGEMENT SYSTEM REQUIREMENT FOR ORGANIZATIONS- ISO 9001:2015

a) needs to demonstrate its ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements

b) aims to enhance customer satisfaction through the effective application of the system, including processes for improvement of the system and the assurance of conformity to customer and applicable statutory and regulatory requirements.

All the requirements of this International Standard are generic and are intended to be applicable to any organization, regardless of its type or size, or the products and services it provides.

STAGES OF PRODUCT OR SERVICE DEVELOPMENT

1.	**Concept and design:** Aim, Competitor analysis, gaps in the market, or customer needs.
2.	**Develop:** Necessary tool needed, validation and analysis of the planned product, prototyping and piloting in the field. This generates vital feedback on how the product
3.	**Production and launch:** Feedback guide design, produce a market-ready version, production scaled, launch and distribution to the market.
4.	**Service and support:** Following the launch of the new product, the period of time when service and support is offered.
5.	**Retirement:** At the end of the product's lifecycle, its withdrawal from the market must be managed – along with any retrials or absorption into new concept ideas.

CLOSING REMARKS

MMA Labs

QUALITY STATEMENT

You will agree with us that standardization is for everyone independent of the field of work or the profession one belongs to. Let us begin to put in the necessary standard protocols in our endeavours to ensure quality outcomes

BEGIN WITH

1. Development of policies and protocols
2. Documentation
3. Getting consumer feedback
4. Training
